through investment

75000\$ for 1000 sqft
onwards per location based
on specifics of every location

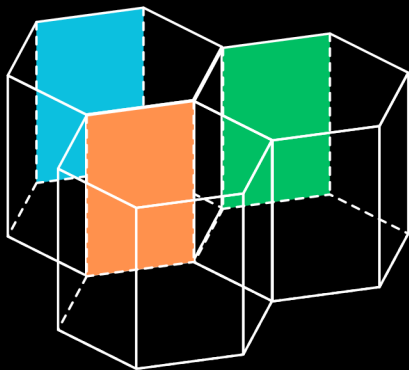

1'st customer location deploment
starts late december early jan
2026

(a few engineering holdups)

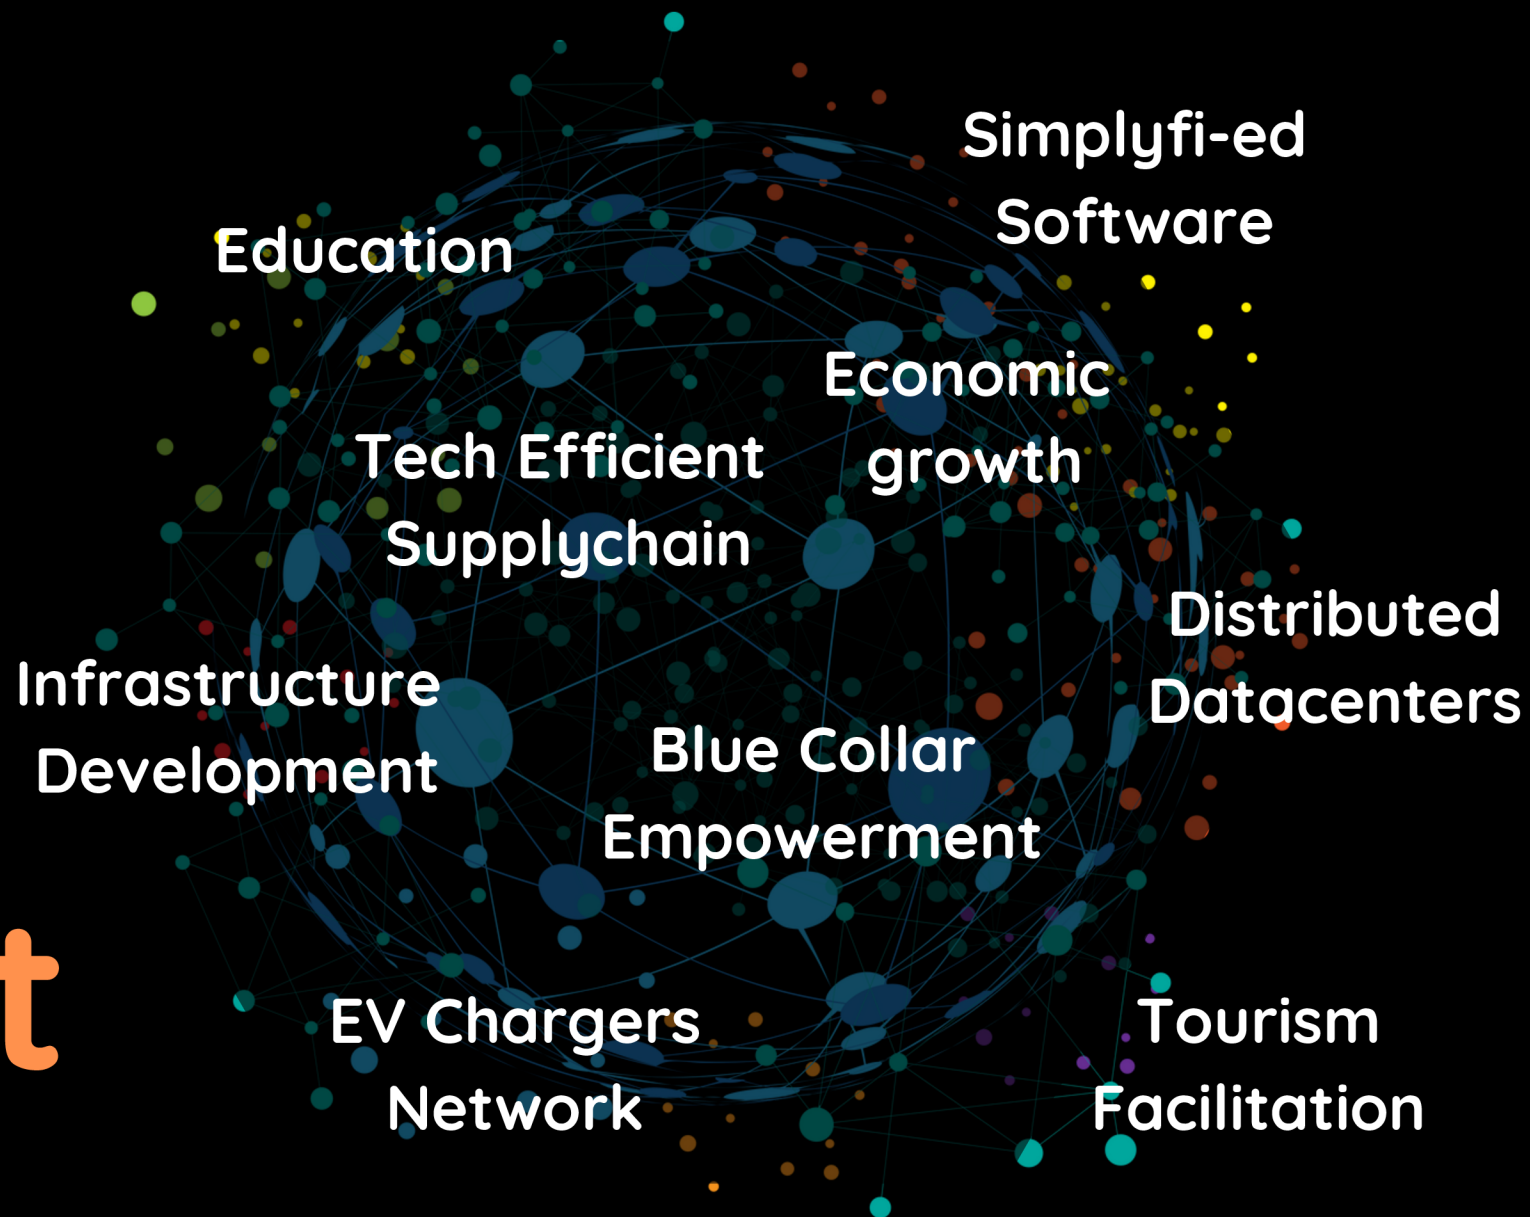

We have a lucrative plan and working towards maximizing the impact for our customer and drive a disruption across industries.

based on If we raise and how much we raise, this is how we plan to accelerate the growth at pikk.company

- Work on a little bigger Pilot (testing & investing in locations proofing profitability of each location & limitations and strengths of the distributed datacenter) 10-15 locations
- Reduce the purchase cost of RAW Materials and Supplies we need.
- Build a better Engineering Product and Services Team
- Import a few components from a better components Manufacturer.
- Improve the Product Quality.
- Invest in a bigger batch of Inventory based on 6 months of Active Pilot
- Unlock Partnerships with bigger brands (have infra to keep up)
- Invest ahead in compliances and safety testings.

Impact

it began in the end of 2020 as a way to organise the kiosks (tapri businesses)
we took inspiration from that beautiful ecosystem to build something which
now is shaping to be so profound.

we have been bootstrapping for the last 4 years, saved a lot of money in R&D
and built a profitably growing steady company.

We are open to fair dilution for an investment based on your expertise and
collaborations which can make an impact to the overall pace of everything.

I personally hope to hear your thoughts on the fundraise terms and deepdive
into other questions.

Thank you for your time, We are looking forward to hearing back from you and discussing the business plan.

Legal Name : Mystic Quantum Pvt Ltd.

maximizing value on realestate used in ev charging, retail and datacenters. eventually, catalysting ev adoption + reduce network failures + empower microbusiness owners. reducing Latency for better gameplay ;) or a payments provider and or enable AI delivery.

selling franchise's, royalties from them. {pikkstops} - {tobrand.biz} unlocks supply chain placements and marketing incomes - outdoor media advertising connected to the organic social media feeds in a way (we are kind working out a logic to this it's more like a continuum)- ev charging revenue {pikkstops} - pikk.company tobrand.biz today helps other businesses with their technology implementations and invest in product design and development.
